

# CERTIFICATE IN COMPLIANCE AND POLLUTION PREVENTION

The Certificate in Compliance and Pollution Prevention covers topics in the areas of environmental law and regulation, environmental economics, pollution, and waste management. Course content emphasizes analytical techniques, technological innovation, and sustainability strategies for businesses.

Several certificate programs are offered in a number of disciplines taught at the Stuart School of Business. These programs provide students with a post-baccalaureate knowledge of an area of specialization within the discipline. Students in these programs

register as certificate students. Certificate programs require a set of three or four courses. Students who are admitted to a master's degree program may apply coursework previously taken in a certificate program toward the requirements for the master's degree.

This certificate is designed for professionals who seek to increase their knowledge and skills in a particular area, as well as earn stackable credentials as part of a degree program.
