

MINOR IN PRE-MEDICAL STUDIES

The minor in premedical studies is intended for those students who plan to apply to medical school and has been approved by the Premedical Advisory Committee. The minor includes courses that satisfy the prerequisite coursework of most medical schools, cover the majority of topics on the MCAT and other entrance examinations, and courses designed to increase the competitiveness of a student's application.

Students may complete courses on this list as part of their major, core curriculum, or free electives. Regardless of where each course fits into a student's curriculum, any student who completes all of these courses (or substitutes approved by the Premedical Advisory Committee) will be credited as having received this minor.
