

# BACHELOR OF SCIENCE IN ASTROPHYSICS

The astrophysics program emphasizes the physics celestial bodies including stars, galaxies, planetary systems, and cosmology as well as introducing students to best observational practices and the instrumentation used in modern astrophysics. Graduates continue on to obtain a Ph.D. or move on to jobs in government, military, universities, the private sector, or teaching positions in middle school and high school. The program is designed so that obtaining dual degrees in astrophysics and physics can be accomplished by most students in four years of study.
